DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

(A) The Applicant must choose one embodiment of the **lint roller support assembly**:

I. A unitary support that includes a cross-member and stationary circular supports (Figures 1-2)

II. A support that has a tubular slider or channel member and a biasing means and circular (Figures 3-5)

III. A support that includes fixed circular bases that include a snap-on cover (Figures 9-10)

IV. A support that includes circular bases and a lint roll support tube having internal biasing means (Figure 11)

(B) Also, the Applicant must choose one embodiment of the **handle**:

V. A handle having a threaded end cap with an aperture (Figure 6)

VI. A handle including means for receiving an extension handle (Figure 7)

VII. A handle including an open bore containing liquid storage chamber with dispensing means (Figure 8)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3,18-19, and 21 are generic.

Art Unit: 1744

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura C. Guidotti whose telephone number is (571) 272-
